

Curriculum Vitae

Yousof Gheisari, MD, PhD

Personal Data

Birth Date: June 18, 1978

Nationality: Iranian

Marital Status: Married

Contact Information

Phone: +98-31-36687087

Email: ygheisari@med.mui.ac.ir, ygheisari@gmail.com

Current Position

- | | |
|--------------|---|
| 2014-Present | Head of the Regenerative Medicine Lab, Kidney Diseases Research Center, Isfahan University of Medical Sciences |
| 2011-Present | Assistant professor of genetics and molecular biology department, faculty of medicine, Isfahan University of Medical Sciences |

Education

- | | |
|-----------|---|
| 2003-2010 | PhD student of medical biotechnology, Pasteur Institute of Iran |
| 2009-2010 | Research fellow in kidney regeneration, Jikei University School of Medicine, Tokyo, Japan |
| 1996-2003 | Medical student, Isfahan University of Medical Sciences |

Field of Interest

Systems biology and regenerative medicine in nephrology

Research Projects

- 2011-2014 Micro RNA expression profile in diabetic nephropathy using microarray and quantitative PCR followed by analysis of protein-protein interaction network to discover novel drug targets (supported by Iranian council of stem cell technology)
- 2012-Present Computational modeling of hypoxia pathway using Petri nets and ODE to describe experimental data on TGF- β pathway behavior in a mouse model of chronic kidney disease (Joint project with the department of electrical engineering of Isfahan University of Technology)
- 2014- Present Assessment of the behavior of regenerating perivascular cells in chronic kidney disease (supported by Iranian council of stem cell technology)
- 2014-2015 Micro RNA target identification for pathway enrichment analysis in gene expression studies
- 2014-2015 Assessing the significance of topographic parameters of nodes in protein-protein interaction networks for pathway enrichment analysis
- 2013-2015 Time course analysis of the expression of genes related to hypoxia and TGF- β pathways in human kidney cells subjected to hypoxia and TGF- β stimulation
- 2011-2014 Computational modeling of hypoxia pathway using Petri nets to describe unpredicted data regarding SDF-1 expression in a mouse model of acute kidney injury (Joint project with the department of electrical engineering of Isfahan University of Technology)
- 2009-2010 Evaluation of the therapeutic effects of human unrestricted somatic stem cells (USSC) in nude mouse model of cisplatin-induced kidney failure
- 2006-2010 Evaluation of the therapeutic effects of CXCR4 over-expression in bone marrow mesenchymal stem cells (MSC) in acute renal failure (PhD Thesis)
- 2008-2009 Determining the time course changes of stromal derived factor (SDF)-1 and hypoxia induced factor (HIF) following ischemia/reperfusion injury
- 2008-2009 Evaluation of the therapeutic effect of MSC and USSC condition media in renal injury

2004-2008	Isolation and <i>in vitro</i> and <i>in vivo</i> characterization of stem cells from chronic and severely damaged mice kidneys
2006-2007	Comparative analysis of 5 different non-viral methods for gene delivery to mouse bone marrow MSC

Skills and Capabilities

General molecular biology techniques (quantitative and qualitative PCR, gene cloning and manipulation, electrophoresis, ...), mammalian cell culture techniques (isolation and characterization of stem cells, flow cytometry, cell differentiation assays, immunocytochemistry and immunohistochemistry, ELISA, ...), gene delivery methods (viral and non-viral), laboratory animal handling skills, bioinformatics, biostatistics and research methodology, design and establishment of research labs.

Language

Persian (native language), English

Teaching Experience

The instructor of systems biology, bioinformatics, molecular biology, and genetic engineering courses for Post Grad students, Isfahan University of Medical Sciences (2011-now)

The instructor of medical biology course for medical students, Isfahan University of Medical Sciences (2011-now)

Several workshops on “lentiviral and non-viral gene delivery to mammalian cells”, “flow cytometry”, “animal handling skills”, “immunohistochemistry”, and “cell culture techniques” (2008-now)

Lectures on “experiment design for biologists” (2008-now)

Director of molecular biology courses for medical students using problem-based learning method (2002-2003)

Director of three “PCR” workshops in Isfahan University of medical Sciences (1999-2002)

Honors

Winner of Razi Festival Award (as co-worker) for studies on bone marrow mesenchymal stem cells (2012)

Research grants from Iranian council of stem cell technology (2009 and 2013)

Travel award from International society of stem cell research (ISSCR) for participation in the 5th ISSCR meeting (2007)

Ranked 1 in PhD entrance exam (2003)
